Subject: Miscellaneous Matters Concerning S-50 Operations.

To: The Area Engineer, Madison Square Area, New York, N. Y.  
Attention: Capt. W. M. Hearon.

1. Reference is made to telephone conversations with Capt. J. H. King on 27 September and with Capt. M. J. Barnett on 28 September concerning certain phases of the S-50 operations. The following will confirm the understanding reached with Capt. Barnett.

2. There has been no change in the arrangements outlined in letter from this office to the Area Engineer, Madison Square Area, dated 2 August 1944, file No. EIDMI-1-d, which provided for Dr. Robert D. Fowler to be reimbursed through the Johns Hopkins University Contract No. W7401 eng-43.

3. Estimated schedule of Product 616 requirements from 1 October 1944 to 10 December 1944 is inclosed. Also inclosed is an estimated schedule of the return of empty containers to Madison Square Area.

4. The Madison Square Area will not be required to procure cylinders for use in transporting finished material.

5. There should be essentially no variation in concentration in individual lots returned to Madison Square Area. At the present, it appears that this returned material will have a concentration of 0.6 per cent. However, this value is dependent upon the method of operation and may have to be revised at a later date.

6. It is estimated that 150 steel cylinders can be loaned to Madison Square Area on a temporary basis until 15 November. This office will take no further action until given definite shipping instructions.
